## PRACTICE USING A VENN DIAGRAM

How is the **rainforest** similar to your **hometown**? How is it different? Fill in this chart to see if they are more alike or more different than you think!

In the pink circle, list some words that describe the weather in the rainforest.  
In the yellow circle, list some words that describe the weather where you live.  
In the orange middle, list some words that describe BOTH environments.  
How are the climates different? How are they the same?

The circles you have just filled in are called a Venn Diagram. Use a Venn Diagram anytime you want to COMPARE two things. If you are comparing more than 2 things, just add more circles!

Try this activity again, listing plants in the rainforest and plants in your town!
